Hylens System (PV)

The Hylens system is an electro-optical relay system for the creation of in-camera image effects which can be manipulated in real time via a hand held controller. The effects vary according to the plug in module used and multiple systems can be used together. The Hylens system is PV mounted and is compatible with any Panavision spherical lens. Various modules are available including Binocular, Still Camera, Wave, Vibe, Wedge, Coucoloris, ND Grads, Gun Sight and Bong.
